Dr. Wang is an excellent teacher, he wants his students to learn the material and makes a good effort to do so. His exams and homework are fair and based on examples completed in class.

This class and its lab are great tools in advancing understanding of control systems concepts. Only slight alterations (if any) in making some of the concepts in the lab be introduced closer to when they're introduced in the class would make the course flow better.

Dr. Wang will skim over material pretty fast, but if questions are asked, he will do his best to explain in further detail.

none

Overall very solid. Explains topics well and answers relevant questions.

You teach well and your homework is fair however, please put all of your work for examples on your slides. This will be very helpful for us to understand the material better when we look back on the information. Thank you for your time, and may God bless you. May God bless you and have a nice day.

good class & instructor

Good stuff.

Undecided on office hours because I haven't utilized them.

class was well structured. would be nice if we had our homework answers before the exam

Professor Wang is an excellent teacher. He is very prepared and delivers course material very effectively. There is no gap between course material and exams, which is very nice.

great professor

Class was fine, the powerpoints could be a little dull and hard to follow but the labs helped with understanding some of the explained material.

This class was one of the better classes I have taken. Dr. Wang takes his time to explain every detail that is necessary for our success in this course. He gives us ample time for assignments, and will often change due dates depending on when assignments were posted/when exams are. I also really appreciated that he allowed us 4 equation sheets front and back for the exams. I am someone who gets test anxiety, and knowing that I could rely on my equation sheets, even when I did not need to, helped me to learn more of the information and be able to retain it on the exam. Overall, I really enjoyed this course.

Dr. Wang is a great professor. He understands that we are students with other classes and responsibilities, and he gives us deadlines that reflect that. He is also open to changing the class schedule to accommodate the students (like moving a test date or a homework due date).

He is also very clear with what will be on tests and is not afraid to help us out with homework problems. Overall Dr. Wang is very approachable, and prepares us well for his class. I am excited to take him again next quarter.

Good instructor and learned a lot

I really liked this class and how it was structured and presented.

all good

Great teacher

Good class, great instructor

Lectures are straight forward and easy to follow. The lectures help prepare for hw and exams.

Good Class. Good Teacher.
